Display motorised drums catalog

Motorized drum for Display by SIREM

The unwinding of many posters in the same advertising street furniture allows to show a great number of sides. The available advertising spaces in town being limited, the unwinding of many posters on the same street furniture increases the potential of the operating location.

The use of tubular motorizations: motor-driven rollers, reduces the space requirement of the device and operates at the same time both sides of the street furniture.

These motorizations have to be highly resistant, operating day and night, winter as summer, in a glassed-in space, with ongoing on/off cycles at short intervals of display.

The performances of SIREM motor-driven rollers together with an electronic unit of control must achieve an accurate and smooth display of the sides.

Choose your motorization

	DISPLAY DIMENSIONS	
	 2m ²	 12m ²
Drum Ø57 mm	X	
Drum Ø72 mm	X	
Drum Ø115 mm		X

FOR DISPLAY UNTIL 2M²
BRUSHLESS MOTORISATION
INTENSIVE USING

TECHNICAL FEATURES :

- Brushless direct current motor
- Zinc-plated steel cylindrical tube
- Supply voltage 24VDC
- Thermal cut-out 104°C
- Insulation class E(120°) VDE 0530
- IPX5 Protection
- S3 service class
- Working temperature : -40°C to +85°C

COMPLY WITH STANDARDS :

- EN 60335-1
- EN 60034-1

Ø57mm Reference	Nominal power consumption (W)	Power rating (W)	Nominal current (A)	Starting current (A)	Nominal motor rotation (RPM)	Ratio	Nominal torque (Nm)	Starting torque (Nm)	Nominal speed (RPM)	Tube length (mm)	Weight (kg)
Brushless motors 24V - 50Hz

ELECTRICAL WIRING

FOR DISPLAY UNTIL 2M²
ASYNCHRONOUS MOTORISATION
INTENSIVE USING

TECHNICAL FEATURES :

- Asynchronous motor
- Zinc-plated steel cylindrical tube
- Permanently lubricated
- Lifespan : 10 000 hours
- Thermal cut-out 155°C
- Class F insulation
- IP44 protection
- S3 service class
- Three phase version (BT4)
- 2m cable in standard
- Working temperature : -20°C to +85°C

OPTIONS AVAILABLE ON DEMANDE :

- Cable length
- Connector
- End caps
- Voltages and frequencies

COMPLY WITH STANDARDS :

- EN 60335-1
- EN 60034-1

FOR DISPLAY UNTIL 12M²
ASYNCHRONOUS MOTOR
INTENSIVE USING

TECHNICAL FEATURES :

- 2 three phase asynchronous motors 4 poles 230Vac
- Steel cylindrical tube
- Power 200W
- Speed : 1200 RPM
- Electronic speed variator to drive the motors (5 to 15hz)
- Stop position is maintained by a power failure brake
- Permanently lubricated
- Lifespan : 10 000 hours
- Thermal cut-out 155°C
- Class F insulation
- IP44 protection
- S3 service class
- Three phase version (FT4)
- Working temperature : -20°C to +85°C

OPTIONS AVAILABLE ON DEMAND :

- Tube length
- Cable length
- Connector
- End caps
- Voltages and frequencies

COMPLY WITH STANDARDS :

- EN 60335-1
- EN 60034-1
